SIGHTING REPORTS FROM NEW ENGLAND

At our July meeting, a member reported seeing a UFO off of Nantasket Beach in the latter part of June. On August 8th, a couple reported seeing a UFO in the Blue Hill area of Mass. Other witnesses of the UFO were found after the first was reported in a local paper. Many UFO reports were a result of an advertizing plane in the Mass. area this summer. However, a very large balloon which was seen by hundreds of people in the Mass. area brought no UFO reports.

Winston, Conn. was the scene this August for a close encounter between 13 campers, their counselor, and a UFO which was described as being the size of a car and about 30 feet away. It hummed like a speaker with feedback and disappeared within a few seconds into the afternoon sky. A woman from Rehoboth felt that she saw a UFO on the night of September 21, 1976.

SIGHTING REPORT FROM OHIO

What appears to be a UFO landing occurred in Ohio during the month of August. Police officers found imprints in a corn field which were pressed 2 inches into the soil. The disk-like imprints formed a perfectly symmetrical triangle. About 27 square feet of corn inside the triangle disk-like shapes were mashed down.

GENERAL UFO INFORMATION

UFO activity reaches a peak every 61 months. This is according to an article in the Enquirer which quotes Dr. Saunders. If you remember, Dr. Saunders was the author of UFO's YES in which he told how he was fired from the Condon Committee. He is conducting a computer study and his most recent reports indicate... "a distinct pattern of peak activity every five years and one month, exists. Each peak moves across the globe from west to east in leaps of 1,500 to 2,000 miles."

According to George Fawcett, who founded the New England UFO Study Group, the Air Force is preparing to release their Blue Book UFO investigations to the Nation Archives in the near future. This will be a censored version. The uncensored version will be released to the public sometime in the next 50 years.

There is a new T.V. program called "In Search Of". It's on Tuesdays at 7:30 P.M. on channel 6. It covers all unexplained topics including UFO's.

TID BITS from THE BERMUDA TRIANGLE

FROM THE DESK OF THE OCCULT HISTORIAN.....ANDREW J. GALLIGAN

The beautiful island of Bermuda was discovered by the Spanish explorer Juan de Bermudez in 1515. Yet it had not been settled until July of 1609 when a tremendous storm tossed the Sea Venture on the deadly shoals. It was captianed by Sir George Somers. Later after seeing all hands safely ashore the captain gave orders to cast her adrift to slowly sink off shore. Many years later in 1958 divers Edmund Downing and well known Teddy Tucker discovered the bony ribs of this wreck off Fort Saint Cathrine.

In the log book of The Sea Venture kept by Sir George Somers the first credible details of possibly a UFO was recorded when he watched it hover over the ship as it entered the danger zone we know today as The Triangle. He described this brilliant light so vividly, as it streaked up into the sky then vanish, that Shakespeare used this tale in his work known as the Tempest.
